

I am the wife of a powerful witch doctor and if a couple couldn't have children, they come to see my husband for. But me, his wife, when I got pregnant the pregnancy always stopped before 5 months. I couldn't understand how the one who gives children to other couples is unable to have children for himself.

One day we heard that there is an evangelistic program in front of the village church. I went for the first evening and enjoyed the preacher's message. The next evening I asked my husband to follow me. We went together. We were touched but my husband was so proud of his fetishes and didn't want to accept that Jesus is more powerful than him.

On the third day I gave my life to Jesus and explained my problem to the Sun of Hope team. They went into our house and spoke for a long time with my husband. Finally, he also gave his life to Jesus. They burned our fetishes and they prayed for us. The pastor visited us regularly and we began by going to church.

11 months after, my son was born without problem, my pregnancy evolved normally until delivery. I asked the pastor to give us some names in the Bible. Among all the names he gave us, we chose to call him Emmanuel because it was God who came to stay with us. If not, it will never be possible.
