

I became a Christian for years, but I am unable to read the Bible or I fall asleep after the first paragraph or I read a page within a year. The day I have hear that the Sun of Hope ministries gives players for those who want to listen to audio Bible study, I understood right away that God had found the solution for my situation. I received my player and I could listen to the chapters of the Bible read for me every day.

It is because of this audio version of the Bible that I started reading the Bible because sometimes I tell myself that what I listen to isn't in the Bible because I didn't know the Bible. I wonder if the words of consolation and encouragement that I listened is true. So I took my Bible to see if it was true or if it is the reader who says what he wants. But it is always true when I check. This program allowed me to rediscover the God I worship and to read the Bible. This program is a real blessing for me
