

When we started this program, many pastors told us that we are wasting our time by trying to bring the Gospel to these people because they are identified as a very hostile people. In fact many projects before us, have tried to preach Jesus to these communities without result. We have used the free veterinary care program to approach the Fulani shepherd communities in order to present them the Gospel. We have become friends and they have given us land to build the churches. This method has really opened many doors for us. By doing this we have planted many churches among these communities.

When people asked us how we got such a result among the Fulani, we answer that it is only the grace of God which can do that. We think that God has remembered all the efforts of the missions and pastors who worked before us, trying to bring them the Word of God and now has mercy of them. What happen with Fulani people is just a miracle of God because normally we are not suppose to have success with this people. But God's plan is so different.... He operate in very different way than what we can imagine.

We thank God for the wave of salvation flowing among the Fulani. Our Vision now is to extend this strategy to the Fulani people in Niger, Burkina Faso and Nigeria.

Please keep praying for the Fulani. God is able to save all of them.
